GENERAL HYDROPONICS®

# FLORAPRO®

## WATER-SOLUBLE FERTILIZERS

## GROWER TESTIMONIALS

Results not typical and reflect only each individual's experience utilizing the product. Results will vary, dependent upon usage case and environmental conditions. Testimonial reflects this individual's experience utilizing the product.

# WHY GROWERS LOVE FLORAPRO

**OPTIMIZED RATIOS**  
**TECHNICAL-GRADE NUTRIENTS**  
**BIG RESULTS**

The latest innovation from the OGs of hydroponics makes it easy to mix thousands of gallons of lab-tested nutrition to feed as many plants as you can grow with each 25 lb bag.

We spoke with some of the industry's top growers using FloraPro in their facilities and loved hearing about their experience. See what they had to say about General Hydroponics FloraPro.

## PHAT PANDA

**"Most soluble salt formalization we have used to date.**

Getting every bit out of it."

**"Cleanest running salts we have used.** Drip emitters and stock tanks remain very clean and we are spending less labor maintaining irrigation systems and tanks."

**"pH is very stable.** We don't see much change over a 24-hour period."

"Finished flower appears to have **more trichomes.**"

"FloraPro is **very cost effective.**"

"FloraPro **works well with other additives,** whether it be GH products or others."

**"All 114 production genetics responded well to FloraPro** and overall lushness of crops improved slightly."

— Mojave Morelli, Director of Cultivation:  
Indoor Cultivation, Phat Panda

## EXPERION

"Great cost-effective nutrient that works very well in conjunction with all of our additives; we have been able to **cut nutrient costs while seeing excellent plant growth and overall health.**"

"We have noticed our **pH has been consistently very stable.**"

"We have seen **high yields between a variety of different strains** while running the FloraPro nutrient line and maintained **excellent trichome development.**"

**"Saw excellent yields when using FloraPro** for all of our cultivars while still achieving a very high level of potency."

— Liam Mckenzie, Master Grower at Experion Biotechnologies Inc. (Received free product)

## CYPRESS GROUP

"We switched over to the FloraPro series about six months ago and **couldn't be happier with the results.**"

"**We are spending less money on nutrients than ever before**, while maintaining our standards for quality and quantity."

"FloraPro **dissolves easily in our reservoir for an even and homogenous feed concentration.**"

"FloraPro is a complete line that has **everything that the plants need to thrive!**"

— Alicia Jones, Cultivation Manager, Cypress Group Indoor Cultivation Licensed Producer

## HAYFORK CANNABIS CO.

"We were first introduced to FloraPro Spring of 2019. When we heard about the new product **we were immediately intrigued by the price and the stated results.** So we decided to go to the headquarters and see for ourselves what the experts had to say.

After a thorough presentation from 2 or 3 scientists that helped develop the game changing formula we were all in. Low price is great and all but can we get the results we're looking for? That turned out to be a big yes!

**After our first year we're committed to FloraPro for 2020 and beyond."**

— Zac Scott and Dana Hauser, head growers/owners, Hayfork Cannabis Co.

## STRONG VERTICAL GARDENS

"Thank you GH for creating the FloraPro line,

We use the Pro Series on our hydroponic indoor microgreens. We use burlap for the grow media and it can be a challenge. But the blend that was created for indoor hydroponics **helps bring out the colors and the flavor in our plants.**

Our chefs and retail customers are very pleased with the products they receive. **The Pro Series has helped us to save on shipping and cost per gallon** in the stock tank. It is so easy to use and **the technical support we have received has been outstanding.**

— Debbie Strong, Owner and Head Grower at Strong Vertical Gardens

## KLONE COLORADO

"I've been using GH FloraPro for a little over 5 months now and I have to say **I can't be more pleased.**"

"From my observation **there are basically no fluctuations as far as the pH is concerned.**"

"With only three parts, **FloraPro is very easy to use and works great with other additives.**"

"FloraPro is very cost effective and **keeps plants healthy during all stages of life.**"

"I use a Dosatron setup with concentrated stock tanks and **there is no solidification or microbial growth** while sitting in a 80-85 degree warehouse."

"Out of every nutrient line I have run in my career, FloraPro is by far the cleanest. I used to have to clean multiple filters and flush irrigation lines at least once a week with other nutrient lines.

**With FloraPro, I only clean filters and flush lines once a month** now. Even when I clean once a month there is no buildup at all, so I don't have to change emitters as often."

— Aaron Mogeran, Head Grower at Klone Colorado, Indoor Cultivation
